Forestry Suppliers' Class II Surveyor's Vest

JIM-GEM® 4-Pocket Survey Vest With Reflective Strips

Lime Green Daytime & Nighttime Mesh Safety Vests

Mesh Daytime/Nighttime Safety Vest

SECO Class 3 Mesh Utility Vest

SECO Class II Surveyor's Vest

SECO Lightweight Safety Utility Vest

Stearns® Classic Sportvest

Surveyor's ANSI Class 2 Safety Vest

**Class III**

**Class II**

**Class I**

The American National Standards Institute (ANSI) approved the American National Standard for High-Visibility Safety Apparel (ANSI/ISEA 107-2004). This standard provides consistent, authoritative guidelines for the selection and use of high-visibility apparel in the United States.

ANSI/ISEA 107-2004 is a voluntary standard that offers performance specifications for reflective materials, including minimum amounts, placement, background material, test methods and care labeling. In simplest terms, the ANSI/ISEA 107-2004 standard provides for a high degree of reflective material incorporated into garments...thus improving visibility...and safety.

ANSI/ISEA 107-2004 specifies three classes of garments based on work environment:

**Class III**

Class III garments provide the highest level of visibility to workers in high-risk environments that involve high task loads, a wide range of weather conditions and traffic exceeding 50 mph. Class III garments, provide coverage to the arms and/or legs as well as the torso, and can include pants, jackets, coveralls or rain wear. The standard recommends these garments for all roadway construction personnel and vehicle operators, utility workers, survey crews, emergency responders, railway workers and accident site investigators.

**Class II**

Class II garments are for users who need greater visibility in poor weather conditions and whose activities occur near roadways where traffic speeds exceed 25 mph. This class of garment is suitable for railway workers, school crossing guards, parking and toll gate personnel, airport ground crews and law enforcement personnel directing traffic. Carolina Safety Sport manufactures a full range of vests that conform to Class II requirements.

**Class I**

These garments are intended for workers who have ample separation from vehicular traffic that does not exceed 25 mph. Class I garments are often safety vests that are recommended for parking service attendants, workers in warehouses with equipment traffic, shopping cart retrievers, sidewalk maintenance workers and delivery vehicle drivers.

Requirement	Class III garments	Class II garments	Class I garments
Background material	1240 square in. (0.80 m <sup>2</sup> )	775 square in. (0.50 m <sup>2</sup> )	217 square in. (0.14 m <sup>2</sup> )
Reflective material	310 square in. (0.20 m <sup>2</sup> )	201 square in. (0.13 m <sup>2</sup> )	155 square in. (0.10 m <sup>2</sup> )
Photometric performance	Level 2	Level 2	Level 2
Combined performance	N/A	N/A	310

### Direct Value Class 1 Safety Vests

Nylon mesh vest with hook-and-loop closure, elastic-strap sides and 1"...

### OK-1® Economy Safety Vest

Features solid polyester design with side ties. Hook-and-loop closure....
